SUMMARY

I am a dedicated Front-End Developer with a strong foundation in software engineering and a passion for creating engaging digital experiences. With two years of experience in transforming Ideas into responsive web applications, I excel in using technologies like HTML, CSS, JavaScript, and React. I thrive in collaborative environments and am committed to continuously learning and applying new technologies in my projects.

EXPERIENCE

Frontend Developer

Logic Racks

📅 03/2024 - Present 📍 Karāchi, Sindh, Pakistan

A company that focuses on developing high-performance web applications.

- Specialized in building dynamic, high-performance, and fully responsive web applications.
- Transformed complex UI/UX designs into fully functional, interactive, and visually engaging applications.
- Wrote clean, maintainable code, integrated APIs, and enhanced application performance.

Jr Frontend Developer

Parallel Solutions

Diploma (Web Development)

Mastered JavaScript, React.js, Redux, and Firebase through SMIT's Web Development course and projects.

PROJECTS

Optics Inventory System

📅 01/2023 - 03/2023

An efficient, scalable, and user-friendly inventory management solution tailored for the optics industry.

- Designed the front-end using React.js, Redux.js, and Tailwind CSS.
- Connect APIs for real-time tracking and management of inventory records.
- Implemented XLSX support for exporting inventory data in Excel format.
- Integrated a feature to extract and process structured data from Excel files.

Trips and Tours Booking System

📅 07/2023 - 09/2023

A platform that enhances the booking experience through real-time data updates.

- Built a Trips Booking System integrating PayPal for secure transactions.
- Created an intuitive interface for users to browse trips and track reservations.
- Designed an admin panel for managing trips and overseeing user activities.
